Superior power integrity and management for midrange client/server computing. This most efficient, reliable, and cost-effective UPS uses high-speed microprocessor and line-interactive technology. Autosenses 50 or 60 Hz and accepts worldwide input voltages. Up to 96% efficiency results in operating costs of 50% less than so-called "high-efficiency" competitive models. Full communications and control is provided locally by front panel and remotely by RS-232 port. Free CheckUPS<sup>®</sup> II Suite software on CD-ROM and cable are bundled with each unit.
